

# TINT INTENSITY METER

worldwide  
environmental

## STANDARD EQUIPMENT

**Lightweight and Compact Tint Intensity Meter**

**User-Friendly with Easy-to-Read Display**

**Single-Button Operation**

**Auto Power Off**

**Wide Temperature Operating Range**

**Power: Four AAA Batteries**

**Fast and Easy Calibration**

**More than 2% Accuracy**

**Independent Own Light Source**

**Wireless Print**

**Optional Transport Case**

The Tint Intensity Meter is an easy-to-use photo-optical device that quickly and accurately measures light transmission through any type of vehicle window and ensure compliance with vehicle regulations.

## TECHNICAL DATA

Display	LED
Voltage	6V DC (4 x 1.5V / AAA)
Operating Temp.	-10° to 50° C
Relative Humidity	0-95% (Non-condensation)
Battery Life	200 Tests
Size	170 x 85 x 35 mm
Weight	500 grams

## HOW IT'S USED

The Tint Intensity Meter is used by aligning the transmitter and receiver on opposite sides of the glass and then pressing the 'Enter' Button. The Tint Intensity Meter then emits a beam of light through the crystal that is detected by its receiving probe on the other side. Next, the unit shows the percentage of light transmission that has passed through the glass. The reading can be recorded manually or printed using the optional portable printer for possible legal tests.

## OPTIONAL EQUIPMENT

**Wireless Infrared  
Printer w/Charger**

**Transport Case**
